

Preliminary Phase	Prepare the organization for successful TOGAF architecture projects. Undertake the preparation and initiation activities required to create an Architecture Capability, including the customization of the TOGAF framework, selection of tools, and the definition of Architecture Principles.
Requirements Management	Ensure that every stage of a TOGAF project is based on and validates business requirements. Requirements are identified, stored, and fed into and out of the relevant ADM phases, which dispose of, address, and prioritize requirements.
Phase A: Architecture Vision	Set the scope, constraints, and expectations for a TOGAF project. Create the Architecture Vision. Identify stakeholders. Validate the business context and create the Statement of Architecture Work. Obtain approvals.
Phase B: Business Architecture Phase C: Information Systems Architectures Phase D: Technology Architecture	Develop architectures in four domains: 1. Business 2. Information Systems – Application 3. Information Systems – Data 4. Technology In each case, develop the Baseline and Target Architecture and analyze gaps.
Phase E: Opportunities and Solutions	Perform initial implementation planning and the identification of delivery vehicles for the building blocks identified in the previous phases. Determine whether an incremental approach is required, and if so identify Transition Architectures.
Phase F: Migration Planning	Develop detailed Implementation and Migration Plan that addresses how to move from the Baseline to the Target Architecture.
Phase G: Implementation Governance	Provide architectural oversight for the implementation. Prepare and issue Architecture Contracts. Ensure that the implementation project conforms to the architecture.
Phase H: Architecture Change Management	Provide continual monitoring and a change management process to ensure that the architecture responds to the needs of the enterprise, and maximizes the business value.

Preliminary Phase

1. Scope the enterprise organizations impacted
2. Confirm governance and support frameworks
3. Define and establish Enterprise Architecture team and organization
4. Identify and establish Architecture Principles
5. Tailor the TOGAF framework and, if any, other selected architecture frameworks
6. Develop a strategy and implementation plan for tools and techniques

Phase A: Architecture Vision

1. Establish the architecture project
2. Identify stakeholders, concerns, and business requirements
3. Confirm and elaborate business goals, business drivers, and constraints
4. Evaluate capabilities
5. Assess readiness for business transformation
6. Define scope
7. Confirm and elaborate Architecture Principles, including business principles
8. Develop Architecture Vision
9. Define the Target Architecture value propositions and KPIs
10. Identify the business transformation risks and mitigation activities
11. Develop Statement of Architecture Work; secure approval

Phase B: Business Architecture

Phase C: Information Systems Architectures

Phase D: Technology Architecture

1. Select reference models, viewpoints, and tools
2. Develop Baseline Architecture Description
3. Develop Target Architecture Description
4. Perform gap analysis
5. Define candidate roadmap components
6. Resolve impacts across the Architecture Landscape
7. Conduct formal stakeholder review
8. Finalize the Architecture
9. Create Architecture Definition Document

Phase E: Opportunities and Solutions

1. Determine/confirm key corporate change attributes
2. Determine business constraints for implementation
3. Review and consolidate gap analysis results from Phases B to D
4. Review consolidated requirements across related business functions
5. Consolidate and reconcile interoperability requirements
6. Refine and validate dependencies
7. Confirm readiness and risk for business transformation
8. Formulate Implementation and Migration Strategy
9. Identify and group major work packages
10. Identify Transition Architectures
11. Create Architecture Roadmap & Implementation and Migration Plan

Phase F: Migration Planning

1. Confirm management framework interactions for Implementation and Migration Plan
2. Assign a business value to each work package
3. Estimate resource requirements, project timings, and availability/delivery vehicle
4. Prioritize the migration projects through the conduct of a cost/benefit assessment and risk validation
5. Confirm Architecture Roadmap and update Architecture Definition Document
6. Complete the Implementation and Migration Plan
7. Complete the development cycle and document lessons learned

Phase G: Implementation Governance

1. Confirm scope and priorities for deployment with development management
2. Identify deployment resources and skills
3. Guide development of solutions deployment
4. Perform Enterprise Architecture Compliance reviews
5. Implement business and IT operations
6. Perform post-implementation review and close the implementation

Phase H: Architecture Change Management

1. Establish value realization process
2. Deploy monitoring tools
3. Manage risks
4. Provide analysis for architecture change management
5. Develop change requirements to meet performance targets
6. Manage governance process
7. Activate the process to implement change

Requirements Management

1. Identify/document requirements
2. Baseline requirements
3. Monitor baseline requirements
4. Identify changed requirement; remove, add, modify, and re-assess priorities
5. Identify changed requirement and record priorities; identify and resolve conflicts; generate requirements impact statements
6. Assess impact of changed requirement on current and previous ADM phases
7. Implement requirements arising from Phase H
8. Update the Architecture Requirements Repository
9. Implement change in the current phase
10. Assess and revise gap analysis for past phases
